

**Full Name:** Martin Kariuki Wanjiku

**Phone Number:** 0768770117

**Email Address:** Judahwamaen8@gmail.com

**Address:** 421-Njoro

**Portfolio:** <https://Martin-mart.github.io/My-Portfolio/>

I am a tech enthusiast currently pursuing a degree in the University of Embu. I am eager

to apply my skills in programming, networking, databases, and problem-solving to

contribute effectively during my first attachment and grow as a valuable team member.

To leverage my knowledge in programming and networking in a practical setting,

contributing meaningfully to organizational goals while enhancing my technical

expertise and collaborative skills during my attachment.

### Education

NO	Certification	Institution	Period
1.	Degree in Information Technology	University of Embu	September 2022 – To date
2.	Kenya Certificate of Secondary Education	Keriko Secondary School	Jan 2017- April 2022
3.	Kenya Certificate of Primary Education	Ndemi Primary School	Jan 2006 -Dec 2016

### Certifications

NO	Certification	Institution	Period
1.	Software Engineering PLP	Online PLP FEB 2025 Cohort	February 2025-date

### Technical Skills:

I possess strong technical skills in programming, some of which include:

- Skilled in basic software engineering, Web Development, Network Basics, Database Systems, and Cybersecurity.
- Developed an e-commerce platform for jersey purchases as one of my many projects on campus.
- Programming Languages: PHP, Python, JavaScript, HTML, CSS
- Database

### Soft Skills:

Some of the soft skills I have include:

- **Communication:** Clear and effective communication with team members and stakeholders.
- **Teamwork:** Ability to collaborate and contribute to achieving team objectives.
- **Problem-Solving:** Analytical mindset to identify issues and develop efficient solutions.
- **Adaptability:** Quick learner, adaptable to new technologies and environments.
- **Time Management:** Capable of prioritizing tasks and meeting deadlines effectively.

### Projects:

Some of the projects I undertook are

### **Ecommerce Platform**

Designed and developed a comprehensive web-based E-commerce platform to enable purchases of different items. **Languages Used:** PHP, HTML, CSS, JavaScript **Key**

#### **Features:**

- i. **User Portal:** A user-friendly interface for users to check products, cancel, and view orders.
- ii. **Responsive Design:** Ensures usability across desktop, tablet, and mobile devices.
- iii. **Database Integration:** Secure storage and retrieval of orders and user information using a structured database system.
- iv. **Search Functionality:** Allows users to search for products by their name or team.
- v. **Checkout:** Allows users to enter their shipping address and use different methods of payment.

More projects are hosted on my website: <https://trishawares.com/>

Impact: Improved operational efficiency by enabling online purchases, thus offering a 24/7 support and having a wide range of customers.
